

EURIdoc - Eucor Upper Rhine Immunology doctoral programme

EURIdoc is a PhD programme offering placements for 28 PhD fellows for 4 years.

EURIdoc builds on the existing collaboration among immunologists in the Upper Rhine region and strengthens the research focus on personalised health – precision medicine.

Doctoral programme in Immunology

EURIdoc - Eucor Upper Rhine Immunology doctoral programme

28 talented young researchers from around the world

EURIdoc has attracted 28 talented young researchers from around the world to its partner institutions:

- University of Basel (6 fellows)
- University of Strasbourg (7 fellows)
- Albert-Ludwig University Freiburg (2 fellows)
- University Medical Center Freiburg (11 fellows)
- Karlsruhe Institute of Technology (2 fellows)

Immunology Research

The research programme in EURIdoc addresses the three themes haematopoiesis and development, innate and adaptive effector functions and immune-related diseases.

Training and secondment opportunities

We want to expand our partnerships in the private sector to support the program. We are seeking opportunities for training and secondments for our EURIdoc fellows. Find out more about the research programme and scientific expertise behind it.
