

Innovation dashboard seminar

<b>Project partners</b>
Université de Strasbourg, Karlsruher Institut für Technologie
<b>Project duration / Awarded funding</b>
01/03/2021 – 31/10/2022 / 22,000€
<b>Short description of the project</b>
The project 'Innovation dashboard seminar' is carried out jointly by the University of Strasbourg and KIT in the field of economics and data science. We propose a joint yearly seminar on data science in form of a student-led software development project. Outcomes will be individual dashboards for data analysis and visualization. The (best) student dashboards are integrated into a common technological platform.
<b>Concrete implementation of the project (What was the funding used for?) (max. 500 characters (including spaces))</b>
<p>KIT Karlsruhe</p> <ul style="list-style-type: none"> <li>• Financing 10% of doctoral position for planning and organization of the seminar.</li> <li>• Hiring of several student assistants to support the preparation of the seminar, research of potential dashboard topics, and preparation of slides for the seminar.</li> </ul> <p>FSEG Strasbourg</p> <ul style="list-style-type: none"> <li>• We hired a student assistant for IT support.</li> <li>• We bought a license to access French economic data.</li> </ul>
<b>Project result(s) and continuation of collaboration (max. 500 characters (including spaces))</b>
<p>The seminar took place in the first semester of the academic year 22/23. Start with a kick-off meeting at KIT Karlsruhe, 07.11.2022. End with final presentations of dashboards at FSEG Strasbourg.</p> <p>Reached objectives: Deepening of bilateral collaboration of students and teaching staff of both universities.</p> <p>Continuation is intended, seminar organization to be adapted (e.g. more obligatory (online) meetings of teams).</p>
